In Search of Better Portfolios

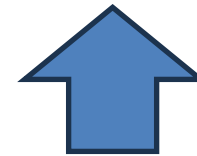

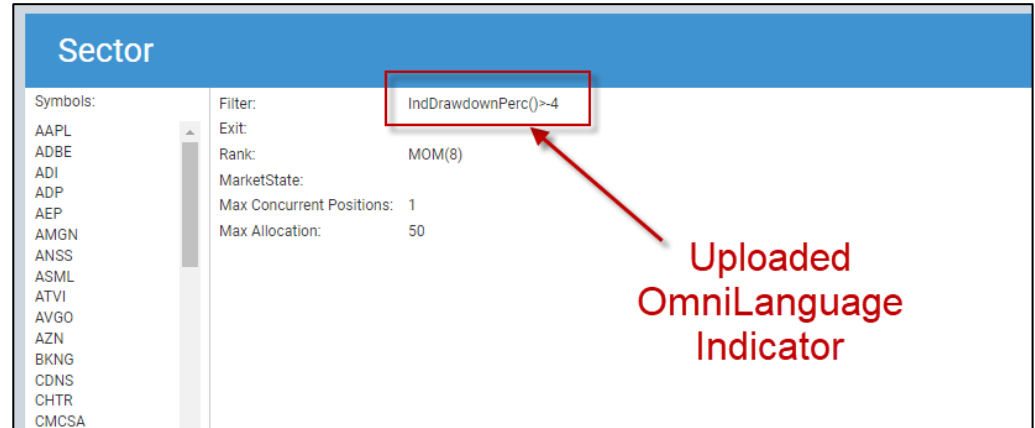

OmniLanguage is Better.

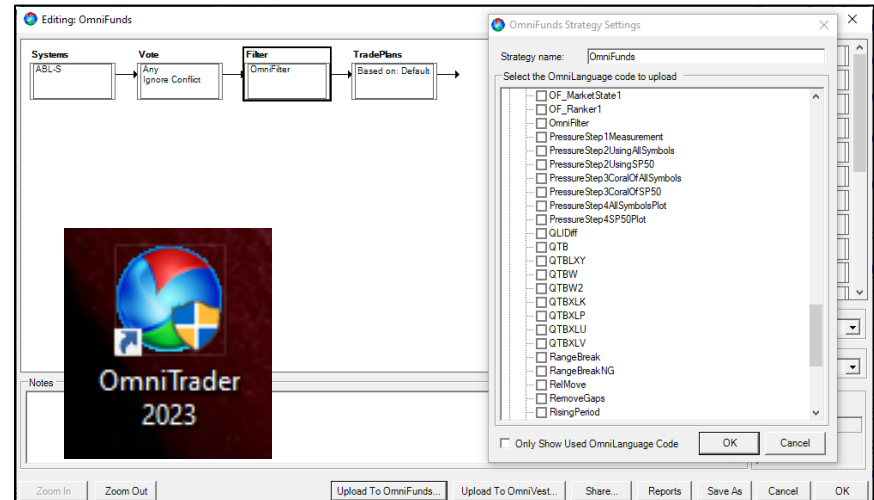

About 98% of our OmniFunds switch using **simple indicators** like RSI or TRII.

Steve Byrne uploaded **Custom OmniLanguage Indicators** he created into OmniFunds.

More complex indicators can manage risk better than a switching approach that is based on simple indicators.

Upload

We Run Strategies on Our Servers.

The screenshot displays the OmniView software interface, which is divided into several sections. A red box highlights the 'Top Strategies' section, which lists various trading strategies with their respective performance metrics. A red arrow points from the 'Stay Connected' section below to the 'Top Strategies' section above.

Can we Get Strategies into OmniFunds?

The Advantages of Strategies:

- We have built many over time. Ready to Deploy.
- OmniTrader makes it easy to develop New Strategies.
- Better control over all aspects of Signal and Exit Generation
- Better List Control: It is possible to use the Dynamic List Concept.
- Easier Integration of our Nirvana A.I. into the platform.

Constantin has connected OmniFunds to OmniVest. We can now Import Strategies into OmniFunds! This is a game changer, folks!

Why Develop Portfolios in OmniVest?

	OmniFunds	OmniVest
Upload Indicators from OmniTrader	YES	YES
Upload Strategies With Systems, Filters, Confirmers, Exits and A.I. Blocks	-	YES
Historical Lists Change over time	-	YES
Dynamic Lists Built on the Best Conditions	-	YES
Test Lists against Systems To find hidden gems.	-	YES
Consensus and Stability Performance Measurements	-	YES
See the Trades' Entries and Exits	-	YES

Another Reason to Use OmniVest

Power Users.

OmniVest is a place where we can upload Strategies (including ATM Strategies) from OmniTrader.

And now, our Power Users are showing us just what can be done.

Eric Severance,
Mark Holstius

And Steve Byrne

The background of the slide is a dark, abstract image featuring out-of-focus light sources (bokeh) in warm tones like orange, yellow, and red, as well as cooler tones like blue and teal. A prominent white diagonal stripe runs from the top-left towards the bottom-right, bisecting the entire slide. The text is centered within the white stripe.

Building Powerful New OmniFunds

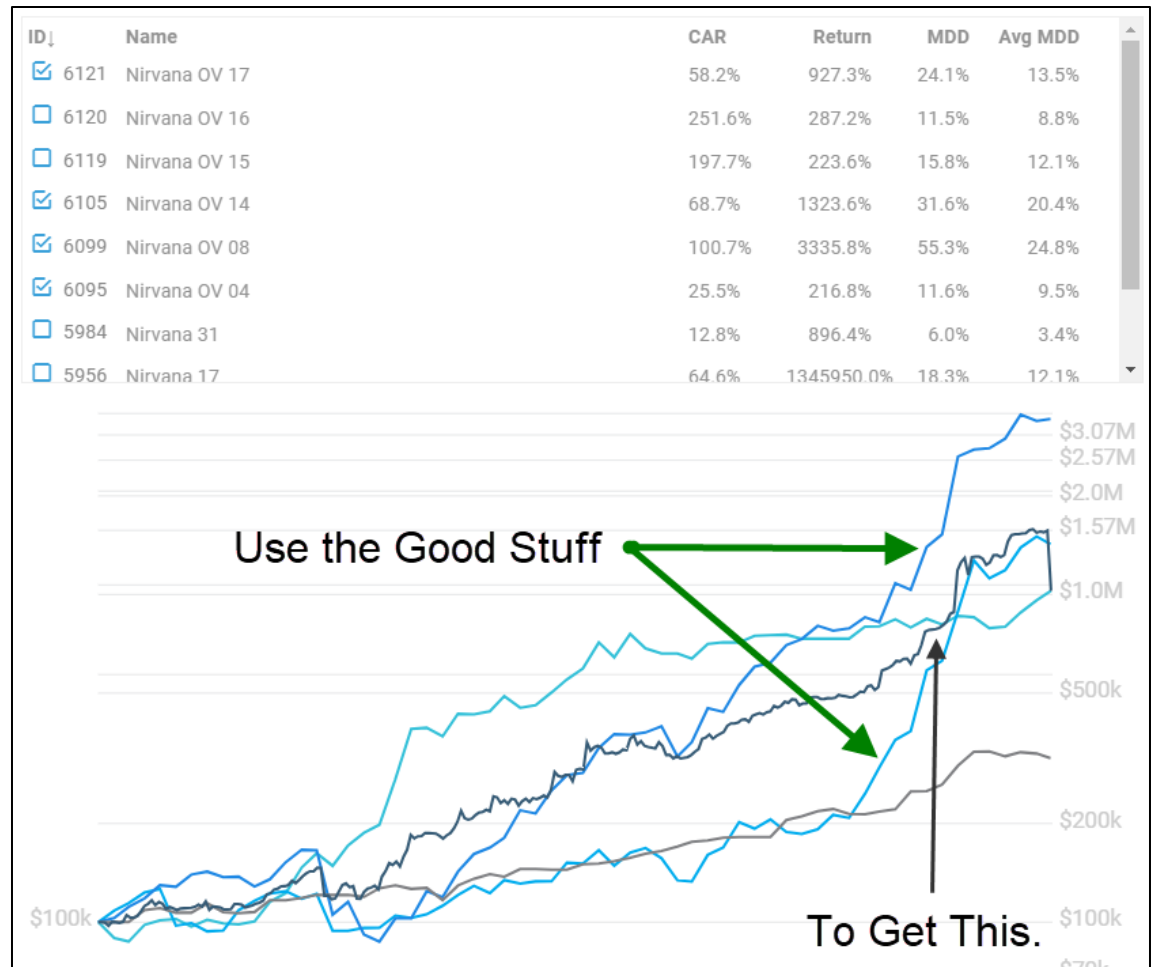

Bringing it All Together...

Multiple Portfolios
can now be used!

Based on OmniVest
Strategies

With Mark's
Switching Algorithm

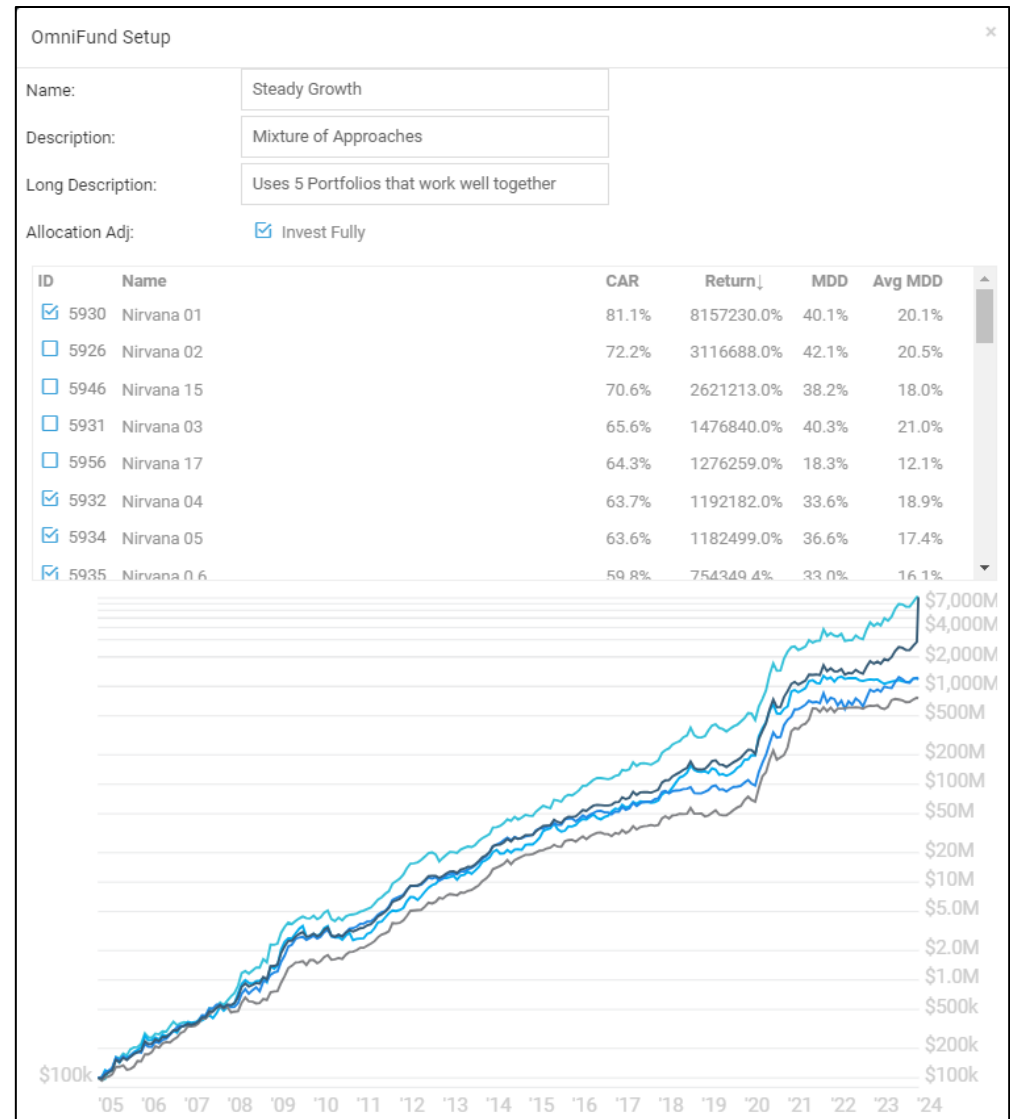

And Power Users,
like Eric and Steve.

The Alpha is Close!

We are now very close to an Alpha Release, so folks in our group can work with the new platform.

Expected:
Monday, Feb 5.

OmniFunds

Because Returns Matter.

The background of the entire image is a bokeh effect of out-of-focus city lights in various colors like blue, orange, and white. A solid white horizontal band runs across the middle of the image, serving as a backdrop for the company name.

OmniFunds
